

SUPPLIES LIST FOR VIRTUAL TECH THEATRE CLASS

Some things to consider

Check with your school's supply chain first--often cheaper!

KIT BOX

(WE USED CHROMEBOOK BOXES, BUT LOTS OF CHOICES AT A DOLLAR STORE)

4x6 index cards

Can be used in SO MANY ways--building models, creating figures, etc. and cheaper and easier for the small parts so students don't "waste" the pieces of cardstock

Pink erasers

Can be ordered cheap through your school purchasing or easy to find at a dollar store

Glue Sticks /White Glue

You can decide which route you want to use or use both! Or use tape. White glue will come in handy when creating props.

Graph Paper

Necessary for easily creating things to scale. Recommend 1/4" scale.

#2 Pencils

Wooden ones are cheaper and allow for better shading/artistic control, BUT you may want to include a sharpener

Scissors

Definitely go the dollar store route for cheap ones

1/2" Masking Tape

This can be any masking tape, really, but the 1/2" is easily to deal with when doing stuff to scale or painting in a smaller scale

Protractor/Rulers

If you had to pick ONE, pick the protractor since students can also figure angles and make curves

Spiral Notebook/Sketchbook

Great for planning out things, beginning sketches, daily drawings, etc. Don't get a "good" sketchbook--again, think dollar store level

White Cardstock

Useful for final images for projects

Watercolor paints

Useful in color theory and design. It is nice for students to get a sense of paint, but could just use colored pencils..

Colored Pencils

For anything needing color-sets, costumes, sketches, etc. Pencils are better than crayons and markers.

Mini-Flashlights (LED minis)

Needed for experimenting with light. Two lights are better, but they may have a phone light, or flashlight at home. We found under a dollar each.
